

Stock Module

Comprehensive Stock Control

The optional FREEWAY stock module is available for users who wish to manage their own stock, and track parts from the supplier through to the vehicle on which they are fitted.

The module is totally integrated with the core fleet management system and automates key stock management features such as the production of **purchase orders**, management of **goods receipt** and **invoice matching**.

The stock list can be built up automatically. Every time a part is allocated to a vehicle it can be recorded in the stock list.

Colour Coded Stock Availability

The emphasis is on ease of use, as can be seen in the colour coded stock availability:

- Black** for parts stocked at the correct level
- Red** for parts urgently required to complete a repair
- Yellow** for parts below re-order level
- Brown** for parts that have been ordered but have not yet been received

Description	Value	Rate	Unit	Mfr Part No.
Battery	£59.00	£59.00	Ea	DET 58827

Exhaust Blimp	£14.30	£14.30	Ea	28197420.0823
Bonnet Strut	£48.28	£48.28	Ea	HG1234567

Reports

As with the rest of FREEWAY, reports can be produced simply and quickly using standard click and select routines. A full set of Crystal Reports is also included with the module.

Stock Details

FREEWAY holds a number of details on each item of stock, including: re-order levels, bin location, preferred suppliers, price paid and recommended retail price. Details of all issues to date. An example of stock detail is shown here.

Replenishment

Parts can be easily manually added to a new Purchase Order for a particular supplier, with the default re-order quantity automatically filled in. FREEWAY can also automatically produce proposal orders based on per store minimum levels.

Fax / E-mail

The purchase order can then be printed and sent to the supplier or automatically faxed or e-mailed from within FREEWAY.

The screenshot shows the 'Edit Details For: Exhaust flange' dialog box. It has tabs for Detail, Held, Usage, and Transactions. The 'Basic Details' section includes: Mfr Part No. (ABC1234), Item Description (Exhaust flange), Latest Price (45), Rate Est. (£45.00), Price Update, Warranty (365 days), Unit (Ea), Bin Location, and Impressed checkbox. The 'Suppliers' section has three dropdown menus for Supplier 1, 2, and 3. The 'Quantities' section includes: Held (4), Assigned (2), Available (2), Reorder Period (0), Reorder Level (2), Reorder Qty (0), Rate Of Use (0), and On Order (0). The 'Costs' section includes: RRP (£45.00), VAT Rate, and Discounted Values (Low, Med, High, all £45.00). There is a 'Re-calculate Discounts' button and 'OK', 'Cancel', and 'Help' buttons at the bottom.
